

WinRx PCLIK Setup

How to import McKesson catalogs from PharmaClik to WinRx

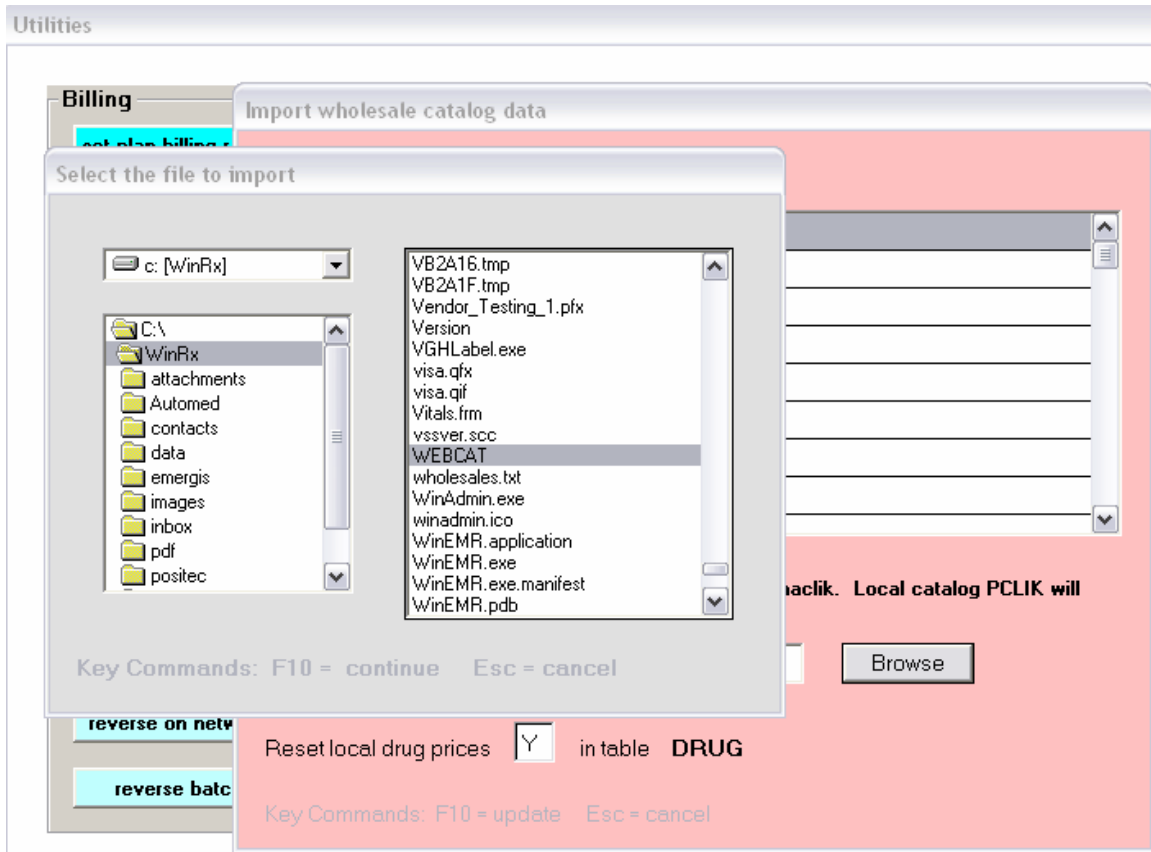

1. Download the McKesson catalog from the PharmaClik website. The download will be in a .zip file so you will need to extract the file to the C:\WinRx folder.

2. Sign on to WinRx as a supervisor and go to Utilities
3. Run "initialize drug file", set the supplier to "PCLIK" and hit F10.

4. Go to "import catalog" and set "reset local drug prices" to "Y".
5. Click Browse, select the catalog file (typically it will be named "WEBCAT") and hit F10, then F10 again to run the import (this may take a few minutes).

6. After that is complete, escape out of there and sign on with your regular WinRx user ID.
7. Go to Browse/System, F2, and set default wholesale to "PCLIK". F10 to save.
8. Go to Browse/Supplier, edit your McKesson supplier and change the ID to "PCLIK". F10 to save.
